Procedure

BALANCE DAY FALL RISK SCREEN

Name: _____ Age _____

Town of Residence _____ Phone _____

Email: _____

Are you currently on our mailing list? YES NO

If "No"

· Would you like to be added to the mailing list? YES NO

Have you fallen in the past year? YES NO

If "Yes"

· How many times? _____

· Were you injured? YES NO

Do you feel unsteady when standing or walking? YES NO

Do you worry about falling? YES NO

If you answered "No" to all three questions, stop here. Please speak with someone here about recommendations.

If you answered "Yes" to any of the questions, please continue speak with someone about physical screens.

If you have questions, please contact:

TYPE YOUR ORGANIZATION HERE

Type organization here to

Type email address here if you have one

TIMED UP & GO TEST:

_____ Seconds

Fall Risk?

YES NO

12 seconds or greater is considered a fall risk

30 Second Chair Stand Test:

_____ # of Stands

Fall Risk?

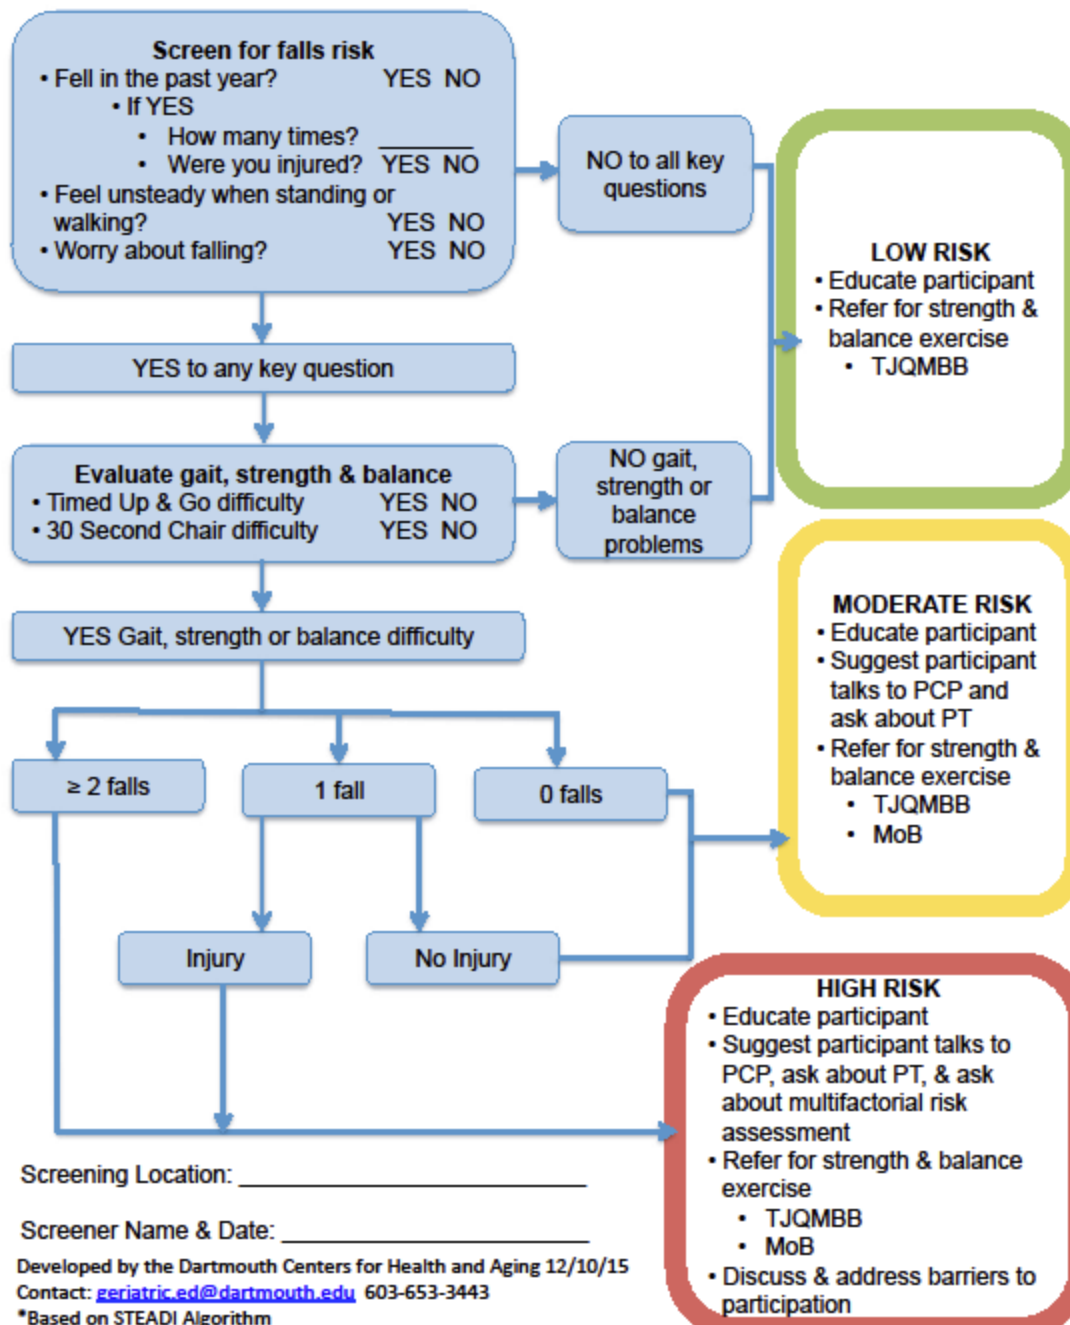

YES NO

A below average score indicates a higher risk to fall

Chair Stand—Below Average Scores

Age	Men	Women
60-64	< 14	< 12
65-69	< 12	< 11
70-74	< 12	< 10
75-79	< 11	< 10
80-84	< 10	< 9
85-89	< 8	< 8
90-94	< 7	< 4

Algorithm for Fall Risk Assessment & Interventions*

Recommendation Handout

Fall Risk Screening Results

You scored at a low fall risk on our Falls Risk Screen

The American Geriatrics Society Guidelines recommend you participate in regular exercise that includes balance and strengthening exercises to keep your risk low and to maintain a high level of function. Based on your falls risk screening results, we recommend you consider joining a program specifically designed to improve balance and decrease fall risk such as Tai Ji Quan: Moving for Better Balance. Please see our current programs list. We can contact you as more programs develop.

Website

Falls Risk Screening Results

You scored at a moderate fall risk on our Falls Risk Screen

The American Geriatrics Society Guidelines recommend you participate in regular exercise that includes balance and strengthening exercises to lower your fall risk and to maintain a high level of function.

- Based on your falls risk screening results, we recommend you consider joining a program specifically designed to improve balance and decrease fall risk such as Tai Ji Quan: Moving for Better Balance or A Matter of Balance. Please see our current programs list. We can contact you as more programs develop.
- We recommend you share these results with your primary care provider and discuss the possibility of physical therapy.

Results

- Aging Resource Center
 - 3 Balance Days
 - 52 screened
 - 33% (n=17) screened moderate risk and 67% (n=35) screened low risk
 - 61% of participants signed up for falls prevention program information
- Charlestown Senior Center
 - 1 Balance Hour
 - 22 people attended
 - 9 screened
 - 17 signed up for TJQMBB program information

Approaches

- Lecture
- Brief Falls Talk
- Program Demo
- Balance Screening

Falls Talk

- Power point in tool kit for short talk
- STEADI Materials: www.cdc.gov/steady/
 - “What You Can Do to Prevent Falls”
- NH Falls Task Force: www.nhfallstaskforce.org
 - Home Safety Assessment
- Written materials/brochures about programs
 - www.TJQMBB.org
 - www.mainehealth.org/mob

Program Demo (TJQMBB)

- Encourage all to try
- Safety-chairs in front- ideally face participants
- Make it fun!
- Example sequence:
 - Weight shift exercise
 - Part Wild Horse Mane Form
 - Breathing to close i.e. Ball bigger/smaller

Balance Screening

- Several stations-minimize wait
- Timed Up & Go and 30 second sit to stand
 - www.cdc.gov/steady- Videos for providers
- Review Results with participant
 - Give the participant the Algorithm and Falls Risk Screening Result Sheet
- Send copy of “Balance Day Fall Risk Screen” to Dartmouth

Thank You!
